

phpMyFAQ 2.6

phpMyFAQ and MS SQL server sometimes truncate faq content

Check your PHP configuration: open your **php.ini** and change the value of **mssql.textsize** according to your bigger faq content, e.g.:

```
; Valid range 0 - 2147483647. Default = 4096.  
;mssql.textsize = 4096  
mssql.textsize = 131072
```
