

# phpMyFAQ 2.0

## What are the requirements for phpMyFAQ 2.0?

You will need

- PHP 4.3.3 or later
- MySQL 4.0 or better or any other supported database
- any Webserver

For the client side you should use a current webbrowser with enabled JavaScript because of the usage of [TinyMCE](#) as WYSIWYG editor and Prototype for new Ajax-powered features in the backend.
